► Bull bodyweights, fat and muscle scans, and scrotal size measurements collected on March 21, 2022, by Roger Evans, Bovine Scanning Services Pty Ltd. ADG = average daily weight gain since birth, in kilograms

► * This group of bulls received rationed DDG pellets in the lead-up to sale, hence their slightly elevated fats over the others

► The following bulls have some pinkey scarring, not deemed detrimental to their roles: lot 36 (JAD R133), lot 41 (JAD R320).

- ▶ All heifers were pregnancy tested in calf (PTIC) by Damien Sotter, Beef Genetics. Pregnancy certificate to be supplied to purchasers
- ▶ Purebred heifer bodyweights, and fat and muscle scans collected on March 21, 2022, by Roger Evans, Bovine Scanning Services
- ▶ Joining sire IDs: Southern Cross Pokerface P1 = AJM P1, JAD Quistacat Q48 = JAD Q48

*** LOT 45 (JAD R51), LOT 47 (JAD R102), LOT 61 (JAD R12) and LOT 78 (JAD R84) are not detectable (ND) as being pregnant as at 23/3/22. These females were all backed-up after AI to the same sire, and we found out too late that this sire had developed a penile stricture, physically preventing him from serving females. These females only had approximately three weeks of detectable joining with an alternate bull prior to pregnancy scanning. We have every confidence they will successfully conceive. We will hold them at our property ("Greenvale", Yeoval) and continue their natural joining to Southern Cross Pokerface P1 (AJM P1). They will be pregnant within six months of sale, with payment only due upon confirmation of pregnancy. JAD will then pay for delivery of the heifers. If for some reason pregnancy cannot be achieved, zero payment will be due. This process has worked seamlessly in previous years.
