THE OFFERING

41 Purebred Speckle Park Bulls

14 PTIC Purebred Speckle Park Heifers

32 PTIC AI-bred F1 Commercial Speckle Park Heifers

Elite Semen Packages

DISCLAIMER: The descriptions of the animals in this catalogue, including their pedigree and other genetic information, has not been verified by the Vendors or the Selling Agents. Whilst all care is applied in producing this catalogue, industry experience suggests that up to 4-5% of DNA parent verification tests may have errors. Consequently, the Vendors and the Selling Agents and their representative(s) do not assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue. Prospective purchasers should satisfy themselves by inspection or otherwise as to the accuracy of the particulars.

THE SIXTH JAD SPECKLE PARK BULL + FEMALE SALE

PATTERNED FOR PROFIT.

Our family welcomes you to the 6th JAD Speckle Park Bull + Female Sale. Thank you very much for showing an interest in our program – we are grateful for your support, and look forward to getting to know you and your breeding program further.

SIX sales! Time certainly flies when you're having fun! Granted, the past 12 months haven't been the easiest for livestock producers but with the Eastern Young Cattle Indicator (EYCI) tipped to get close to 800c/kg by July/August (Simon Quilty, Global AgriTrends), there is growing positivity within the beef industry and plenty to look forward to.

This year, we will host our inaugural JAD Queensland Speckle Park and Angus Bull Sale - set down for August at Rolleston in Central QLD. Most of the animals within this catalogue are ET-bred from earlier in our Spring 2022 calving season, with the later-born natural-bred and ET-bred progeny to head to Queensland later in the year.

We trust you will peruse this catalogue and see the consistency of type we are developing here at JAD. Our use of a select few fully performance-recorded sires is really starting to pay dividends. These animals have multiple generations of performance recording behind them, meaning our bulls offer estimated breeding values (EBVs) with similar accuracies to those found for Angus bulls of the same age from leading studs in that breed.

As we ponder where JAD and the Speckle Park breed will be in another five years from now, we are confident that our breeding decisions so far have put us in good stead to prepare our stud for the future. Our stud is hugely diverse in genetics, giving us a solid foundation from which to breed new sires and use them within.

We have embraced independent assessment of our animals, inching forward each year as measured not just by the percentage of animals that 'make the grade', but more importantly the percentage that sit right at the top of the tree.

JAD Speckle Park is one of very few studs that carry a five-star Breedplan Completeness of Performance rating. Although we put a lot of emphasis on Breedplan and data, our core fundamental benchmarks are with the utmost importance placed on temperament, feet and legs, scrotal, and udder quality. We are about **breeding for longevity** - encompassing fertility - to ensure commercial relevance for us and our clients. All bulls and purebred heifers in the sale have scored either a 1, 1.5 or 2 for docility.

We would like to thank our families, friends, and service providers for their immeasurable support - especially Justin's parents, Tony and Kate. We would also like to thank our team member, Stewart McKenzie, for his valued contribution to the JAD business.

With thanks,

Justin, Amy, Jack and Mitchell Dickens.

Program:

- ▶ Inspections: From 9am
- ▶ Sale: 1pm
- ▶ Complimentary morning tea, lunch and post-sale refreshments will be available
- ▶ Join us after the sale for a social get-together in the JAD Sale Complex!

Selling Agents and Auctioneer:

The sale will be conducted as a video auction by Bowyer and Livermore, with Brian Leslie, Dairy Livestock Services (DLS), as Guest Auctioneer. All animals will be available for pre-sale inspection on the day of the sale.

Bowyer and Livermore: (02) 6331 5166
 Nick Fogarty: (0409) 070 225
 Todd Clements: (0429) 070 225
 Justin Guy: (0421) 467 520

Brian Leslie: (0418) 365 934

All lots will be sold under the Australian Livestock & Property Agents Association Ltd Standard Stud Stock Auction Terms and Conditions of Sale. If unfamiliar with these terms, please contact Bowyer and Livermore. Please check with the Selling Agents to obtain a buyer's number and registration slip, if you are considering bidding in the sale. Successful purchasers are requested to give written advice to the Selling Agents, regarding transport arrangements, at the sale's conclusion.

Outside Agents:

A rebate of 2% is offered to outside agents who introduce buyers to the selling agent in writing at least 24 hours prior to the sale, and settle accounts on the purchaser's behalf within 7 days of the sale.

Client Rebates:

A rebate of 5% is offered to clients who have purchased at a previous JAD Sale, who introduce buyers to the selling agent in writing at least 24 hours prior to the sale, and settle accounts on the purchaser's behalf within 7 days of the sale.

Supplementary Information:

A Supplementary Handbook will be available on sale day, including current scan data, weights, pregnancy status, and further information on the PTIC commercial heifer lots.

Insurance:

Purchasers are strongly encouraged to immediately insure their new acquisition(s). Stud cattle are a valuable and vulnerable piece of farm equipment.

Unable to Attend the Sale?

Bid online via AuctionsPlus.

The sale will be interfaced as a sequential auction on AuctionsPlus, with live video and audio streamed for online bidders and viewers. There will also be individual videos of each live lot posted to the AuctionsPlus catalogue in the weeks leading up to the sale. Please also register as an AuctionsPlus user at least 24 hours prior to the sale in order to bid. Note that transport arrangements must be organised on sale day. See page 18 for more details.

Phone Bidding: If you would prefer to place your bids over the phone, please contact one of the Bowyer and Livermore agents at least 24 hours prior to the sale to make arrangements.

GST:

All animals are sold exclusive of Goods and Services Tax (GST). I.e. If a bull is sold for \$5000, you will be charged \$5500.

Mobile Reception:

Mobile phone reception will be stabilised at the sale venue through external boosters. For phone bidding, please contact a Bowyer and Livermore agent.

Feeding and Management:

Our 2022-drop of cattle were weaned at approximately 5-7 months old. They received weaner pellets as part of the weaning process and were grown out on pasture, and only supplemented when pasture quality was waning. We aim to have our bulls grow out at between 1-1.3kg/day their entire lives. The cattle are now in peak health, with rumens in

great balance to handle whatever pasture conditions they encounter at their new home. The cattle have been handled with dogs, UTVs, motorcycles, and on foot. None of the cattle have ever had their feet trimmed in any way. We will NEVER hoof trim our cattle to mask faults. Never ever.

Herd Health:

Some animals in the catalogue have minor pinkeye scarring, not deemed detrimental to their functionality. We strongly recommend annual animal health booster shots.

PUREBRED BULLS:

- ▶ All DNA tested to verify they are not persistently infected (PI test) with Pestivirus
- ▶ All vaccinated with chilled Trivalent (3 germ) tick fever vaccine on 14/9/2023
- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Double vaccinated with Vibrovax (booster pre-sale)
- ▶ Drench to be administered prior to sale day.

PUREBRED FEMALES:

- ▶ DNA tested to verify they are not persistently infected (PI test) with Pestivirus
- ▶ All vaccinated with chilled Trivalent (3 germ) tick fever vaccine on 14/9/2023
- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Drench to be administered prior to sale day.

COMMERCIAL HEIFERS:

- ▶ Pestigard booster to be administered prior to sale day
- ▶ 7-in-1 booster to be administered prior to sale day
- ▶ Drenched to be administered prior to sale day.

Under the Johnes Beef Assurance Score (J-BAS) system, JAD Speckle Park carries a J-BAS 6.

The JAD Guarantee:

Every bull is guaranteed to be a breeder at the time of sale and is guaranteed fertile for **12 months** from sale day. If a bull should prove infertile or unable to serve cows naturally, the vendor will either:

- 1) Provide a satisfactory replacement, or
- 2) Provide a cash refund equal to the purchase value of the bull less salvage value. No credits provided.

It is the purchaser's responsibility to provide a certificate from a registered veterinarian before the 12 months is up to verify infertility, and that it was not the result of an illness, injury, or misadventure. The guarantee covers the purchase value of the bull, without interest, costs and damages. We recommend that all purchasers discuss injury insurance of their purchases at the sale with the on-site representatives or their agent. This guarantee is in addition to the normal terms and conditions governing auction sales. All females were confirmed pregnant by Dr Stuart Geard, Holbrook Breeders

Australia on February 14, 2024. A pregnancy confirmation does not guarantee that a healthy, live calf will be born. In the event that a purebred female aborts her calf or fails to birth a live, healthy calf, JAD Speckle Park will provide two straws of semen from the JAD LN Tank, free of charge and for within-herd use only. It is the purchaser's responsibility to collect/transport this semen.

Livestock Freight:

Formal possession, risk and expenses pass to the buyer at the fall of the hammer. JAD Speckle Park and/or agents, Bowyer & Livermore, can assist with arranging transport. Macdeb Livestock Transport has been booked to deliver sale cattle north and south, and will do so in the week after the sale, at the purchaser's expense. Please liaise directly with Mac Jones to book.

- ▶ **Macdeb Livestock Transport.** Contact Mac Jones at (0408) 572 507.

Frozen Genetics:

- ▶ All semen is stored at Holbrook Breeders Australia, and is qualified for domestic use only. Insurance and freight ex. Holbrook is the responsibility of the purchaser
- ▶ There will be no embryos offered in the 2024 JAD Sale.

Semen Rights:

JAD Speckle Park reserves the right to collect up to 200 straws of semen from any bull in the sale, for within herd use only. Any semen collection will be at our cost and the purchaser's convenience.

Embryo Collection Disclaimer

No heifers in this catalogue have been flushed prior to sale.

Breedplan:

We are proud of our commitment to the collection and reporting of performance data for BREEDPLAN. By submitting raw data to the system, we are ultimately improving the accuracy of resultant EBVs to deliver real value to our clients to assist in their decision-making. JAD Speckle Park has a five-star Breedplan Completeness of Performance rating. Speckle Park Single-Step BREEDPLAN EBVs reported in this catalogue come from the February 2024 run. See further information about BREEDPLAN EBVs and a Percentiles Table on pages 14-16.

Veterinarian's Physical Examination of Bulls/Females:

Bulls:

All bulls offered have passed a crushside and morphology semen evaluation, carried out by Dr Stuart Geard and Jodie Mohr of Holbrook Breeders Australia, or Dr Hennie Strydom of Wellington Veterinary Hospital. This assessment certifies the

“We have been using the Q-select testing for 10 years and have seen vast improvements in our weight gains, not only in calves still on their mothers but even more so as they start to develop on feed. The four parts to the Q-select test all have their benefits. By focussing on using Leptin TT sires, we have lifted our weaning weights over the past seven years and we are seeing an increase on the number of TT progeny each year. It’s definitely a worthwhile tool to assist in herd improvement.”

Justin Johner, Johner Stock Farm, Canada.

bulls are fit for natural service, however does not guarantee their semen will freeze for artificial breeding. Additionally, no bulls have been health tested for export qualification purposes. All bulls are sold without guarantee that they will meet all health testing requirements for semen export.

Females:

The reproductive tract of all purebred females has been checked by Dr Stuart Geard, Holbrook Breeders. JAD Speckle Park is committed to only ever sell purebred females that have passed this physical examination.

Raw Data:

Fat and muscle scanning, and scrotal circumferences were measured on November 16-17, 2023, by Roger Evans, Bovine Scanning Services Pty Ltd, Tamworth, when the animals were 13-16 months old. This data was submitted to Breedplan to increase the accuracy of EBVs.

DNA Testing:

All bulls and purebred females have been fully DNA tested at Neogen Australasia, with results published:

100K SNP Profile for every bull and purebred female

Parent Verification (PV) for every bull and purebred female in the sale

| | |
|-------------------|--|
| Coat Colour | RGF – homozygous dominant black RGC – dominant black/recessive red RGW – wildtype red gene carrier |
| Poll/Horn Testing | PcPc – homozygous polled HPc – carries one copy of the horn gene |
| Myostatin | NC – non-carrier of the nt821 myostatin gene C – carrier of one copy of the nt821 myostatin gene |

Leptin

Represented as TT, CT or CC. Read the following page for more information about Leptin.

Leptin Testing:

JAD Speckle Park was the first Australasian Speckle Park stud to undertake DNA testing specifically for economically-important beef production traits, including leptin. All purebred lots have their Leptin test results published.

Leptin TT is the preferred genotype - TT cattle will show improved carcass traits over CC cattle, with CT cattle being somewhere in the middle. Cattle inherit one copy of the gene from their dam, and one copy from their sire. This means that if you have a TT bull, the calves can only be either CT or TT, as he only passes down one T allele.

Leptin is a mammalian hormone with the primary function of decreasing appetite - it is known as the ‘appetite gene’. Leptin TTs have an overall increased rate of fat accumulation compared to leptin CC. For Leptin TTs, this mainly results in:

- ▶ Increased weaning weight
- ▶ Increased cow productive life due to increased body condition
- ▶ Increased milk production
- ▶ Increased 12th rib backfat
- ▶ Impacts yield grade and marbling

Complimentary Sale Day Selection Service

We have arranged to have renowned beef consultant, Dick Whale, present on sale day to assist people with their selections. Please feel free to utilise this complimentary service.

- ▶ **Dick Whale:** Independent Breeding and Marketing Services (IBMS). P: (0427) 697 968, richardgwhale@bigpond.com

Registration Transfers with Speckle Park International (SPI):

JAD Speckle Park will take care of and pay for ownership transfers of registered lots on behalf of the purchaser. SPI

SALE INFORMATION

Registration Transfers will be submitted to SPI within one month's completion of the sale.

Visitor Safety:

All of the sale animals have been screened for temperament and are quiet to handle under normal circumstances. However, there are inherent risks with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN/PRAMS MUST NOT ENTER THE PENS.

People entering the yards are at risk of injury. Be especially alert to bulls fighting. We do not expect the bulls to be aggressive with humans, but sale day places extraordinary pressure on them as they experience an entirely foreign environment. Do not crowd the bulls or loiter inside the pens.

When You Get Your New Animal(s) Home

On arrival at their new home it is important a suitable mob of animals (eg: pregnant cows, steers) is yarded to greet the new animal(s), to minimise stress on them. The bulls are in good joining condition at point of sale, but it is imperative to ensure good nutrition for the bull during the joining period. You should check the bulls regularly to see they are working, especially in the first three weeks of joining when the majority of problems occur. Watch for any signs of injury, infection (any high temperature can compromise bull semen quality) or possible serving dysfunction. Early detection of any problems can minimise the impact of the quality of service your bull provides, and conception rates.

Thank You, Thank You, Thank You:

Sales like this one don't just happen - they take a whole team effort, and we are so grateful to those who have assisted us:

- ▶ First and foremost, thank you to Justin's parents, Tony and Kate Dickens, for everything they do for us
- ▶ Our highly valued team member, Stewart McKenzie. Thanks Stew for all your efforts throughout the year
- ▶ Justin's sister, Kimberly, and her partner, Michael, who provide the catering at our sale and do a cracking job!
- ▶ Justin's cousin, Kristy Judge, and her family, who come to our sales, chip in, and help make sale day a memorable occasion for our entire family
- ▶ Our long-time friend, Paul Keating (Keato), who helps at every JAD sale and loves a good Speckle Park steak!
- ▶ Our friend and contract breeding partner, Bill Findlay
- ▶ Great friends, the McKenzie family, Maungahina Stud, NZ, whose genetics are highly represented in this catalogue and we are very grateful for this opportunity
- ▶ Nick Fogarty, Todd Clemens, Justin Guy and the entire team at Bowyer & Livermore. A special thank you also to junior agent, Harry O'Malley, who stepped in and helped us with taking photos and videos for this catalogue/sale when Justin was struck down with the dreaded man flu!
- ▶ Guest auctioneer, Brian Leslie, Dairy Livestock Services
- ▶ Struan and Mon from studstocksales.com - legends!
- ▶ Dick Whale, Independent Breeding & Marketing Services
- ▶ Dr Stuart Geard and the highly professional team from Holbrook Breeders Australia.

A big shout-out and thank you to all Speckle Park stud breeders who share our common goal to see this breed thrive and prosper on its truly admirable qualities. Achieving wider recognition for a relatively new breed is no easy feat. We must continue to work together to prove the breed's undeniable merits. Thank you.

**THANK YOU
VERY MUCH
FOR SUPPORTING
OUR SALE**

Dickens Family

SALE INFORMATION

COLOUR PATTERN GUIDE

It is important to understand how Speckle Park colour patterns work in order to achieve your breeding goals. While some breeders are mostly interested in producing speckled cattle, others want to inject the notorious hybrid vigour of Speckle Park, while retaining predominantly black herds. For example, when a solid black Speckle Park bull is joined with 100% purebred Angus cows, the resulting calves will be solid black. Another example is when Angus cows are joined to a white Speckle Park bull, the resulting calves will be predominately speckled.

Speckle Park cattle have four distinct colour patterns; speckled, leopard, white pointed and solid black. The speckle and leopard colour pattern are genetically the same except for varying degrees of spotting. Some Speckle Park cattle can produce red colour patterns if both parents carry the recessive red gene.

Please remember when dealing with nature individual results will vary.

The guide is just that – a guide – and Mother Nature has the final say.

SELECTING GENETICS FOR IMPROVED MSA

The different components affecting whether carcasses meet MSA compliance specifications are all influenced to some extent by genetics and can be improved through the selection of animals with appropriate genetics.

MEAT COLOUR & PH

Dark meat colour (ie. over an AUSMEAT score of 3), commonly referred to as 'dark cutting' is associated with low muscle glycogen levels in the live animal prior to slaughter, thus resulting in an unappealing product for consumers. Similarly, if there is only a small amount of muscle glycogen present pre-slaughter, pH may not decline to the required level. Maintaining glycogen levels pre-slaughter is consequently of utmost importance and can be achieved by minimising stress and/or activity both on-farm and in the lead up to slaughter. Cattle with poor temperament have an adverse effect on the cattle around them, all of which results in higher pH carcasses and a higher incidence of dark cutting. Selection for improved temperament can be achieved by ensuring that all animals used in a breeding program have acceptable temperament.

Further, research has demonstrated that animals with higher muscle content, as defined by size of carcass eye muscle area (EMA) adjusted for hot standard carcass weight, is strongly associated with reduced incidence of dark cutting. A reduction in the incidence of dark cutting in high muscled cattle also complements the other advantages of muscular cattle, such as increased retail beef yield and processing efficiency. Selection for increased muscle content in a standard weight carcass can be achieved by selection of animals with higher EMA EBVs. EMA EBVs are estimates of the genetic differences between animals in eye muscle area at the 12/13th rib site in a standard weight steer carcass, with higher EBVs associated with larger eye muscle area. For example, an animal with an EMA EBV of +1.7 mm would be expected to produce calves with larger eye muscle area than an animal with an EMA EBV of +0.1 mm, relative to carcass weight.

RIB FAT THICKNESS & FAT DISTRIBUTION

Rib fat thickness is the measured depth of subcutaneous fat over the quartered rib site between the 5th and 13th ribs. A covering of fat is needed to protect the high value primal cuts from rapid chilling, which can cause toughening, and to enhance eating quality and appearance. In addition to minimum fat levels, a key requirement for all beef markets is to have adequate cover over the high-value cuts along the loin (back) and rump. MSA requires carcasses to have adequate fat coverage over all major primals, with an area of inadequate fat distribution not being greater than 10cm x 10cm over each individual primal. Selection for adequate rib fat and fat distribution can be achieved by selection of animals with appropriate Rib and Rump Fat EBVs. Rib and Rump Fat EBVs are estimates of the genetic differences between animals in fat depth at the 12/13th rib and P8 rump site respectively in a standard weight steer carcass, with higher EBVs associated with greater fat depth. For example, an animal with a Rib Fat EBV of +1.3 mm would be expected to produce calves with more fat than an animal with a Rib Fat EBV of -0.5 mm, relative to carcass weight.

TAKE HOME MESSAGES

Whilst many of the factors that affect the eating quality of a carcass and its suitability for MSA programs are heavily influenced by animal handling and management, many factors are also influenced by the genetics of an animal. Selection of animals with acceptable temperament, higher Eye Muscle Area EBVs and appropriate Rib & Rump Fat EBVs can improve MSA compliance, whilst selection of animals with higher IMF EBVs to increase marbling score, higher Growth EBVs to reduce ossification score, higher Rib Fat EBVs to increase carcass fatness and higher Carcass Weight EBVs to increase HSCW at the same maturity, will increase MSA Index values and thus increase the eating quality of your herd. To further discuss breeding for MSA programs, please contact staff at Southern Beef Technology Services (SBTS) and Tropical Beef Technology Services (TBTS). More information about Meat Standards Australia is also available from the MLA website.

SPECKLE PARK

AUCTIONEER

INDEPENDENT
BEEF CONSULTANT

BRIAN LESLIE

Brian Leslie
Auctioneer

Dairy Livestock Services (DLS), VIC

Brian Leslie is one of the most renowned and highly regarded dairy auctioneers in the world, and he has been the Guest Auctioneer at all JAD Speckle Park sales to date. We saw Brian sell at the 2017 Melbourne Royal Show Speckle Park Feature Sale and were thoroughly impressed by his ability to recall pedigree information, sell with clarity and fairness, and the overall atmosphere he created.

Brian has been auctioneering for the past 40+ years, specialising in dairy cattle. He has sold ALL of the record-priced dairy cattle of each breed, including the highest priced dairy animal ever in Australia at \$251,000 at International Dairy Week (IDW) in 2018. He has sold in each state of Australia and New Zealand for several decades. Although mainly dairy, Brian has sold at the famous Lawson, Te Mania and Weeran Angus sales for 30+ years.

He is a partner with family in Leslie Farms (Pooley Bridge Holsteins) at Arcadia near Shepparton, VIC, that have won Premier Breeder/ Exhibitor of IDW no less than 13 times, along with over 30 Champions including Grand Champion Cow three times. Brian's cattle have won many Grand Champions at Melbourne Royal and he has sold animals to several countries, including the national record producer of Japan.

DICK WHALE

Dick Whale
Independent Beef Consultant

Independent Breeding and Marketing Services (IBMS), Wangaratta, VIC

Dick Whale from Independent Marketing and Breeding Services (IBMS) is JAD Speckle Park's ongoing independent beef consultant, assessing our animals for structure and temperament. He uses a combination of the Genetic Type Summary (GTS) and Beef Class Structural Assessment System to score each phenotype trait.

All sale animals catalogued were considered acceptable for soundness, muscling, doing ability, docility and more. These scores can be found with each lot description in this catalogue. JAD Speckle Park places a very high degree of importance on structural soundness and temperament. Dick will be present on sale day to assist clients with their selections. Dick can be contacted directly prior to sale day at (0427) 697 968.

See pages 12 and 13 for description of the assessment system.

THE JAD ADVANTAGE

We are a commercial and customer-focused Speckle Park breeding operation which aims to deliver seedstock that will improve the long-term efficiency and profitability of the beef industry, and consistently “plate up” a unique and memorable beef eating experience for the end consumer.

We feel strongly that the Speckle Park breed in Australia will benefit from bulls and females that have been bred under our strict standards, and they are backed by our 12-month “JAD Guarantee” – we are in this journey together.

When you buy a JAD Speckle Park, you can be assured that they have been heavily measured and scrutinised. Our stud carries a five-star BREEDPLAN Completeness of Performance rating, acknowledging the effort we make

to measurement and maintaining contemporary group completeness right through to 15-17 months old, in an effort to achieve more accurate EBVs. We aim for a balanced set of objectively measured traits, and work to gradually optimise growth and carcass traits – not in quantum leaps.

We put in the hard work to give our clients the confidence to back us and our cattle.

We are passionate about our cattle and hold a strong female-focussed vision for what we want our herd to look like. Our cattle must be structurally sound, medium-framed, deep-barrelled, thick, and soft with good temperaments, longevity, and a low maintenance requirement. The result is progeny that will calve easily, grow, finish quickly, and grade highly.

We look forward to working in partnership with you.

A GLOBAL INFLUENCE

We travel to Canada and New Zealand regularly to get to know the different breeders and their breeding programs, to see genetic lines in the flesh, and to select our “picks” to infuse into our herd through extensive ET and AI programs.

INDEPENDENTLY ASSESSED

All bulls are semen tested, reproductive organs are examined in all bulls and purebred females, and all purebreds are independently assessed for structural soundness and temperament.

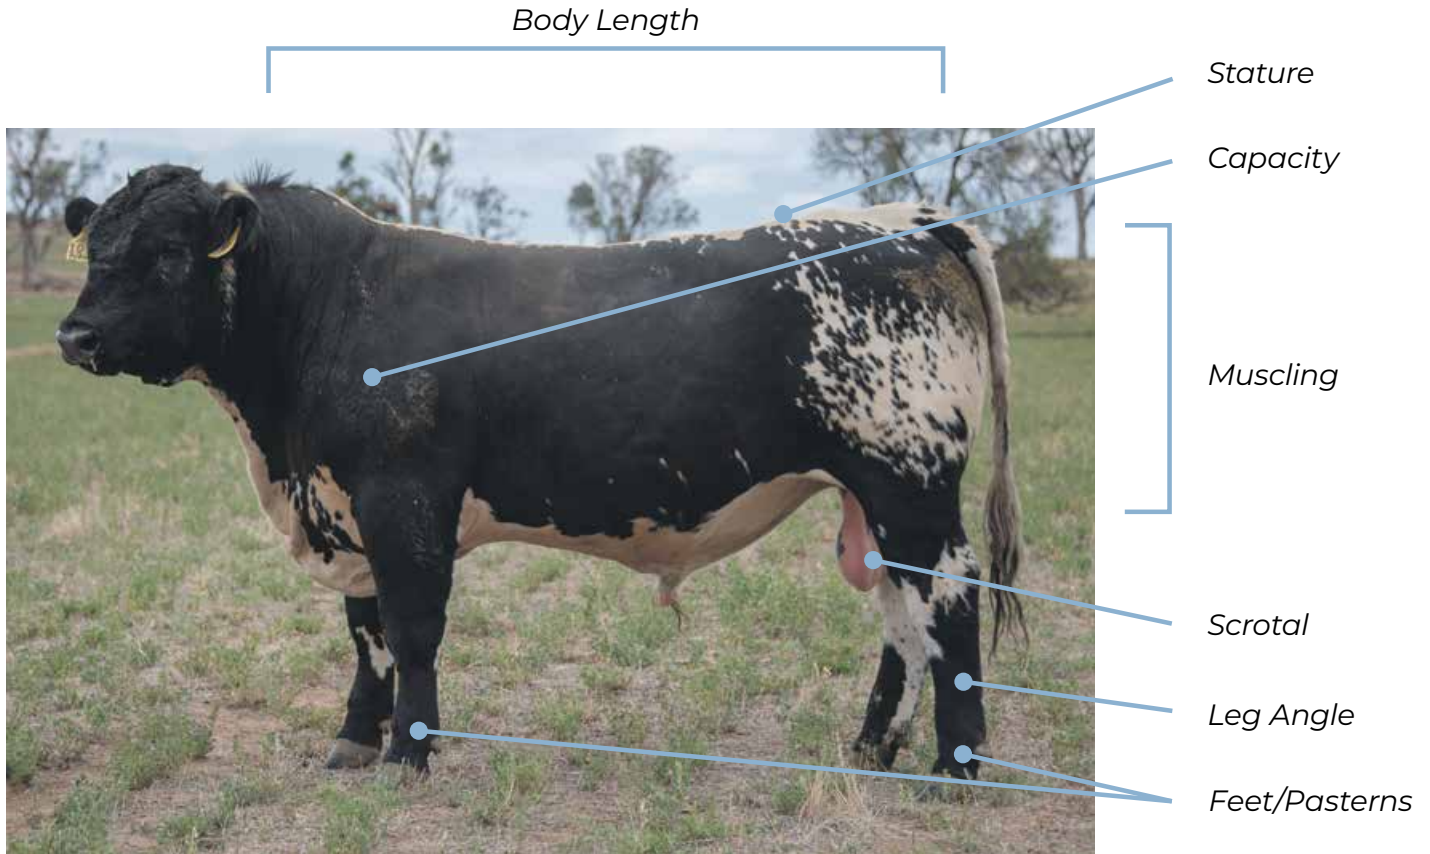

DATA RECORDED

JAD carries a five-star BREEDPLAN Completeness of Performance rating. Our extra effort is to improve the accuracy of resultant EBVs and deliver real value to our clients to assist them in their decision-making.

TEAMWORK + CUSTOMER SERVICE

We are both just as passionate about Speckle Park cattle as each other, and we are committed to helping our clients achieve their goals in a long-lasting partnership.

Structural Soundness Traits

| | |
|---------------|--|
| Feet | Evaluation of the shape and evenness of the front and rear feet, with 5 being ideal. Scores greater than 5 exhibit some scissor claw in feet. Scores less than 5 are open clawed. |
| Pastern Angle | Evaluation of strength of pastern, depth of heel and length of foot, with five ideal. Scores greater than 5 tend towards having shallow heel, less than 5 towards being stubbed toe. |
| Side View | Evaluation of the angle measured at the front of the hock. Scores greater than five indicate towards sickle hocked, less than 5 indicate the animals towards being straight (post-legged). |

Descriptive Traits

| | |
|--------------|--|
| Stature | Evaluation of bulls for maturity pattern and frame size. A stature score of 25 is average. This score may be influenced by age of dam, nutrition etc. Scores greater than 25 indicate larger frame, later maturing cattle. |
| Capacity | Evaluation combines depth of rib, spring of rib and width of chest floor. Scores greater than 25 indicate a bull with larger capacity. |
| Body Length | Evaluation of body length from point of shoulder to pin bone. Scores greater than 25 indicate longer body length. |
| Muscle Score | Is the muscularity of the bull devoid of subcutaneous fat. Higher scores indicate animals with higher yield attributes. Scores 25 = C muscle 30 = C+ 35 = B40 = B 45 = B+ |
| Doability | The ability of a bull to deposit fat in fat depots, relative to their peers under a common management regime. |

STRUCTURAL ASSESSMENTS

STATURE

Evaluation of an animals frame size, based on visual assessment of the animals hip height.

| | | | | | | | | | | | |
|--------------------|---|---|----|----|----|----|----|----|----|----|----|
| Score | 0 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 |
| Frame score equiv. | | | | 3 | 4 | 5 | 6 | 7 | 8 | | |

CAPACITY

Evaluation of an animal by visual assessment combining depth of fore rib along with spring of rib and width of chest floor as well as depth of flank.

| | | | | | | | | | | | |
|-------|---|---|----|----|----|----|----|----|----|----|----|
| Score | 0 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 |
|-------|---|---|----|----|----|----|----|----|----|----|----|

The greater the score, the greater an animals capacity.

BODY LENGTH

Evaluation by visual assessment of an animals length from withers to pins.

| | | | | | | | | | | | |
|-------|---|---|----|----|----|----|----|----|----|----|----|
| Score | 0 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 |
|-------|---|---|----|----|----|----|----|----|----|----|----|

The greater the score, the greater the body length.

FRONT FEET

| Scoring Range | Description |
|---------------|--|
| 1 - 9 | 1 - open divergent; 5 - good; 9 - extreme scissor claw |
| 1 - 9 | 1 - open divergent; 5 - good; 9 - extreme scissor claw |

Reference: Shape (primarily curl) and evenness of the claw set.

BACK FEET

Reference: Angle measured at the front of the hock.

SIDE VIEW

| Scoring Range | Description |
|---------------|---|
| 1 - 9 | 1 - steep (stubbed toe); 5 - good; 9 - shallow heel |
| 1 - 9 | 1 - steep (stubbed toe); 5 - good; 9 - shallow heel |

Reference: Strength of pastern, depth of heel and length of foot.

PASTERN ANGLE

MUSCLING

Evaluation by visual assessment of an animals combined width of rump and hindquarter, with secondary consideration given to forearm muscling.

| | | | | | | | | | | | |
|-------------------|---|---|----|----|----|----|----|----|----|----|----|
| Score | 0 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 | 45 | 50 |
| Equivalent Muscle | | | D | D+ | C- | C | C+ | B- | B | B+ | |

SHEATH

Evaluating the tightness of the sheath of the bull.

| | | | | | |
|-------|---|---|---|---|---|
| Score | 1 | 2 | 3 | 4 | 5 |
|-------|---|---|---|---|---|

Pendulous & loose

Good & tight

Structural problems and temperament in cattle have a substantial effect on both the reproductive and growth performance of a beef herd. It is widely recognised that structural problems in sires have detrimental effects on conception rates, calving patterns and thus profitability. Similarly, females with inadequate structural characteristics are more prone to weaning lighter calves or conceiving later in the breeding season than their more functional counterparts. These structural problems are filtered through the supply chain resulting in reduced income for the producer, feedlot and overall industry productivity.

Dick Whale assesses our sale cattle at least twice in their life before sale day. Having our cattle independently assessed assists us to make unbiased decisions around culling for structure and temperament. Dick will be available on sale day to assist potential purchasers in their selection decisions, connecting individual breeding objectives with the most suitable catalogued animal(s) for that job. Please introduce yourself to Dick and utilise this complimentary service that we hope will assist you on sale day.

DICK'S PICK

Dick's Pick – Dick's top 3 bulls and 3 purebred heifers, based on his independent assessment, have been identified in this sale catalogue. Keep an eye out for this icon to see Dick's Picks!

BREAKING DOWN BREEDPLAN

Estimated Breeding Values (EBVs) published in this catalogue are from the February 2024 SINGLE-STEP BREEDPLAN run. Below is a description for each EBV and how to apply the information practically:

EBV FOR BIRTH WEIGHT (BWT)

Birth weight is a major factor in calving difficulty. Use EBVs to select against birth weight if dystocia is a problem. The lower the EBV the lighter the calves are expected to be.

EBVS FOR 200-DAY GROWTH AND MILK

Vealer producers should place emphasis on the 200-day growth and milk genes. If the bull is to be used as a terminal sire, growth is most important. If a bull is to be used to breed replacement heifers, and superior milking and mothering ability is required, then consider the milk genes with the EBV for milk (kg). The estimate in kg milk is not the yield of milk of the dam, but the growth of the calf due to more milk and better mothering of the dam. At JAD Speckle Park, we submit two 200-day weights for improved accuracy of this EBV.

EBV FOR 400-DAY WEIGHT

400-day weight EBVs are a measure of the animal's ability to grow to 400-days-of age (can be measured from 301-500 days). It should be used by producers who wish to turn off yearling cattle. At JAD Speckle Park, we submit two 400-day weights for improved accuracy of this EBV.

EBV FOR 600-DAY WEIGHT

600-day EBVs are computed for growth to 600-days-of-age (can be measured at 501-900 days). It is the best prediction

of an animal's ability to grow onto maturity, hence it is important for the heavy steer producer.

CARCASE TRAITS

These traits are calculated from live scan data and are adjusted to a standard steer carcase weight of 300kg.

FAT DEPTH EBV (RIB AND RUMP)

Measured in millimetres at either 12/13 rib or P8 sites. As these EBVs increase, the progeny can be expected to fatten more easily but carcase yield may decline.

RETAIL BEEF YIELD (RBY%)

The percentage of retail cuts compared to total carcase weight. Related to EMA and Fat Depth and Weight EBVs.

INTRA MUSCULAR FAT (IMF%)

The percentage of fat to muscle in the eye muscle. Used as a more precise measure than Marbling Score.

EYE MUSCLE AREA (EMA)

EBVs are relative to the breed average EBV each trait. A larger EMA EBV (sq.cm.) means more muscling and generally higher carcase yield relative to carcase weight.

SPECKLE PARK SINGLE-STEP BREEDPLAN

Speckle Park Single-Step BREEDPLAN uses pedigree, performance and genomic information simultaneously. The analysis takes account of each animal's actual genetic relationship with all other genotyped animals, including those in the reference population. The EBVs in all herds relate to a common base. This increases the accuracy of the data, as well as allowing comparison of the genetic merit of the animals from different herds (across herd) within the group.

Each reported trait shows an EBV and its Accuracy level. The EBV (Estimated Breeding Value) provides the best current estimate of the bull's true genetic merit for that trait, relative to the overall base for the Speckle Park breed. It indicates how his progeny should perform relative to those of other bulls in the breed.

The Accuracy indicates how well an EBV predicts the true genetic worth of an animal. The Accuracy of an EBV will be higher for traits with a higher heritability and will increase as more performance information on an animal and its relatives becomes available. The Accuracy of an EBV is reported as a percentage. EBVs with high accuracy will change less than EBVs of low Accuracy when more performance records are analysed.

The following guide may be useful for interpreting Accuracy:

- ▶ **Less than 50% Accuracy** - the EBVs are preliminary. EBVs in this range will have been calculated based on very little information. These EBVs could change substantially as more direct performance information becomes available on the animal
- ▶ **50-74% Accuracy** - the EBVs are of medium Accuracy. EBVs in this range will usually have been calculated based on the animal's own performance and some limited pedigree information
- ▶ **75-90% Accuracy** - the EBVs are of medium-high Accuracy. EBVs in this range will usually have been calculated based on the animal's own performance coupled with the performance for a small number of the animal's progeny.
- ▶ **More than 90% Accuracy** - the EBVs are a high Accuracy estimate of the animal's true breeding value. It is unlikely that EBVs will change considerably with addition of more progeny data.

SPECKLE PARK SELECTION INDEXES

There were four selection indexes introduced for the Speckle Park breed in mid-2023: domestic maternal, domestic terminal, export maternal and export terminal. Please visit www.specklepark.org/learn-breedplan to learn all about the new indexes and which one best suits your program.

Strong futures begin with healthy minds.

We're here to sell livestock. To feed passions, make memories, and create futures. Let's take a moment to acknowledge that none of that is possible without strong mental health.

Depression. Suicide. Pain. Loss. Bewilderment. Hopelessness.

Poor mental health affects more of us in the grandstands today than we can imagine. Its impact on society is monumental and it is claiming some of society's best. It took my Mum when I was 17 and has impacted me hugely. The Black Dog Institute is a fantastic initiative that is dedicated to understanding, preventing and treating mental illness. I have selected my favourite bull in this sale catalogue – chosen for no particular reason other than him being my favourite – and we will donate 10% of the auction sale price of this bull to the Black Dog Institute. Please, don't suffer in silence.

This year's selection is **Lot 2: JAD Tambourine Man T76.**

Amy

Getting to the Sale

Sale Location:
"Greenvale"
911 Loombah Road
YEOVAL NSW

Visit jadspecklepark.com.au/contact to download a map and directions. Or, type "JAD Speckle Park" as your destination in Google Maps.

Transport

The sale location is approximately 70-75 minutes drive from the Dubbo, Parkes or Orange airports. Due to the uncertainty around flight times, we recommend you carry out your own research into current flight arrangements to these destinations.

Accommodation

There are a number of Motels, Hotels and Caravan Parks in Wellington, Molong, and Yeoval. Please book in advance to ensure you secure your accommodation, and feel free to reach out to Amy at (0427) 464 333 or jad@jadspecklepark.com.au for assistance. Alternatively, you are welcome to bring your caravan/campervan/tent and camp at our property for the night after our sale.

Bridge Motel, Wellington

5 Lee Street, Wellington
Phone: (02) 6845 2555
www.wellingtonbridgemotel.com.au

Hermitage Hill, Wellington

135 Maxwell Street, Wellington
Phone: (02) 6845 4469

The Grand Hotel, Wellington

111-113 Lee Street, Wellington
Phone: (02) 6845 1303

Royal Hotel Yeoval

13 Obley Road, Yeoval
Phone: (02) 6846 4003

The Molong Motor Inn

12 Gidley St, Molong
Phone: (02) 6366 8099

Please note that **Goonoo Homestead**, Yeoval, is booked out for the dates of the 2024 JAD Sale.

AuctionsPlus

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select “**Sign Up**” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “**Dashboard**” and then select “**Request Approval to Buy**”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

MAU P194

Maungahina Promise

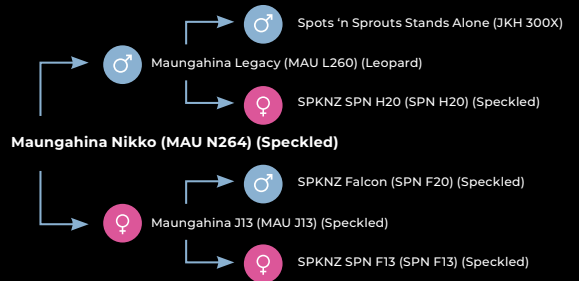

We purchased Promise for a then-New Zealand record NZ\$35,000 in 2020. His progeny are super docile, with a little extra bone and length of body. He is out of the same cow as our co-owned sire, Maungahina Nikko. His first daughters are milking very well.

MAU N264

Maungahina Nikko

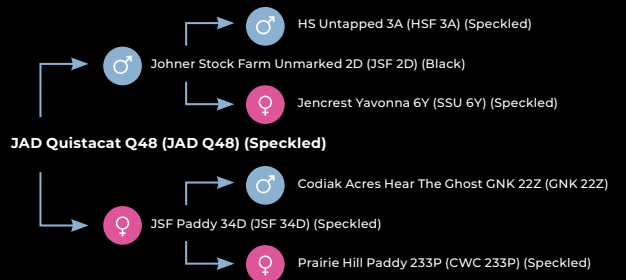

We co-purchased Nikko in 2019, and he is breeding exceptionally well. We have gone on to use him extensively. Nikko is one of the best-moving Speckle Park bulls we have seen, and is breeding very little waste in his progeny.

JAD Q48

JAD Quistacat Q48

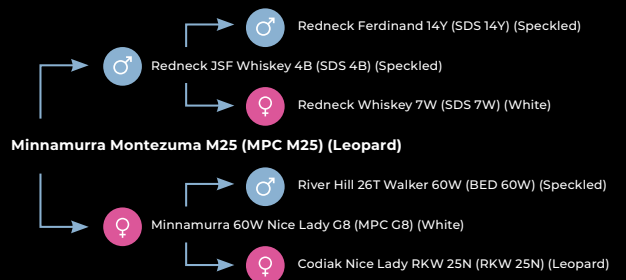

Quistacat is the most fluent-moving Speckle Park bull we have seen. Excellent structure, top 1% of the breed for scrotal size, and producing excellent docility in his progeny. His first daughters have raised excellent calves, and have held their condition well.

MPC M25

Minnamurra Montezuma M25

Montezuma has become a household name in Speckle Park, combining calving ease, short gestation and lower birthweights with plenty of growth, muscle and top 10% fats. Extra length and softness.

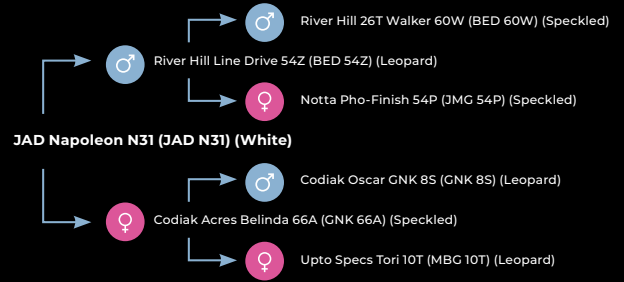

JAD N31

JAD Napoleon N31

Napoleon was the \$24,000 top-priced bull of the inaugural JAD Sale in 2019, and we purchased him back in May 2021. A well-proven heifer bull, his sexed female and conventional semen has been popular.

JAD N22

JAD Nutcracker N22

A full brother to JAD Napoleon N31, Nutcracker N22 was also sold at our 2019 sale and then we purchased him back in 2022. A very sound sire, with an ideal maturity pattern + softness.

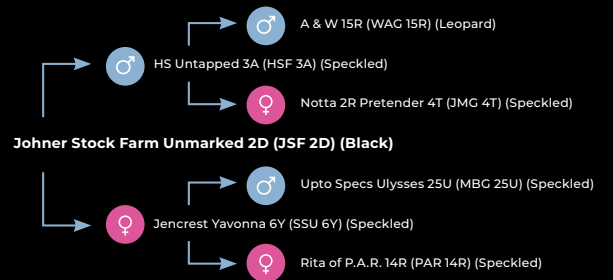

JSF 2D

JSF Unmarked 2D

Unmarked's progeny are moderate framed, soft, easy-keeping cattle, with tremendous spring of rib. He produces high yielding carcass cattle with positive fats. He is the sire of our resident sire, JAD Quistacat Q48.

JKH 300X

Spots 'n Sprouts Stands Alone

Stands Alone has been an outstanding sire in the breed, producing some of the breed's most renowned dams and sires globally, including Maungahina Legacy. With 604 registered progeny, he is a trait leader for 400- and 600-day growth, with 96% accuracy.

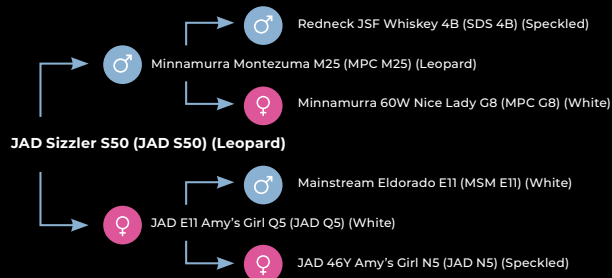

JAD S50

JAD Sizzler S50

JAD Sizzler S50 was the \$55,000 top-priced bull of our 2023 JAD Sale, purchased by Big Star Speckle Park and Ron Potter Farms. We are grateful to have been granted permission to sell females in calf to this breed great in the making!

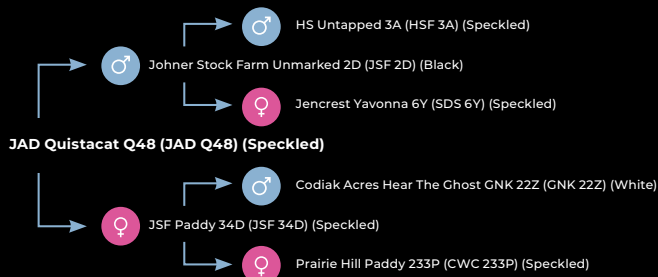

JAD Q48

JAD Quistacat Q48

Anyone who follows our program knows how highly we rate Quistacat. His daughters feature outstanding structure and docility, and they milk well too. He features in the top 1% of the breed for the Domestic Maternal Index, and top 5% for the Export Maternal Index.

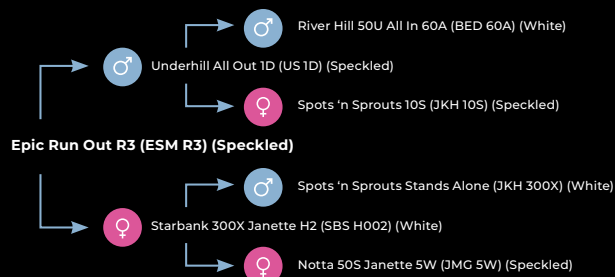

ESM R3

Epic Run Out R3

Justin inspected Run Out and his outstanding dam while on tour throughout VIC and SA early last year. He was impressed with them both, enough to bring Run Out into our program as an AI Sire. A calving ease bull with extra bone, growth, and great structure.

WLS S166

Whiteline Sergeant S166

Justin inspected Sergeant S166 early last year and was really impressed with his overall structure. He is a fully performance-recorded sire, featuring in the top 5% of the breed for gestation length, and top 10% for birthweight.

Sire: Minnamurra Montezuma M25.

Dam: JAD E11 Koda Q6.

Leading off our 2024 sale catalogue, Tuckerbox T33 is an impressive slick-coated bull that couples short gestation length with plenty of growth, and outstanding carcass traits too.

His sire, Minnamurra Montezuma M25, has become one of the go-to heifer bulls in the breed, without compromising growth. He produced the \$55,000 top-priced bull of the 2023 JAD sale, JAD Sizzler S50. Tuckerbox T33 is out of a cow who continues to impress us each year, with her pedigree including Mainstream Eldorado E11 and Jackungah Koda K01.

Tambourine Man T76 has been an eye-catching bull for some time. We strategically combined the carcass traits of Maungahina Legacy with the fats of Maungahina Northern Star and his sire, Kidmans Cove. What has resulted is a bull here who features in the top 1% of the breed for growth, carcass, and both terminal indexes in the breed. He is also in the top 15% of the breed for both maternal indexes. Tambourine Man T76 has been selected as Amy's favourite bull in the catalogue, with 10% of proceeds from his sale to be donated to the Black Dog Institute. Tazer T47 has full ET-bred brothers at lots 12, 13 and 14.

Tarcutta T196 is the favourite of many who have looked through our bull offering. He stands out from his peers with tremendous depth and softness.

Tarcutta T196's dam, Unique Q42, is a flush sister to the \$40,000 top-priced heifer of our 2022 JAD sale. This bull is one of many in the catalogue that scored 7 out of 8 for structure/docility by independent assessor, Dick Whale. Tarcutta T196 is in the top 1% of the breed for milk. He is yet another Legacy/Northern Star cross - a combination that works very well to balance growth, carcass, and maternal traits.

Tesla T19 is an excellent heifer bull option, coming from a cow who is quickly accelerating to become one of the best producers in our herd.

Tesla T19 is in the top 5% of the breed for gestation length and birthweight. We have retained a full brother and sister to this bull in our herd. The full brother, JAD Top Gun T7, was the highest indexing bull of the 25 involved in our University of Newcastle meat research last year, factoring in results from intramuscular fat (IMF), fat melting point, and fatty acid analysis.

Toronto T17 is a full brother to JAD Sherrif S25, who sold for \$18,000 at last year's JAD sale to Minnamurra Speckle Park.

Toronto T17 is a deep-sided, easy-doing bull out of one of our best cows, Fancy Free N66. This cow bred the \$34,000 equal top-priced bull of our 2021 JAD sale. We have retained a full sister (Fancy Free S13) to this bull, from our S-drops, who we regard as the best cow of that year drop. She will undoubtedly feature prominently in our herd in the years to come. Toronto T17 has a full brother catalogued as lot 18.

Tobasco T21 is a powerful, heavily-muscled son of our New Zealand sire, Maungahina Promise. He features in the top 5% of the breed across the board for growth, together with strong milk, scrotal and carcass EBVs.

Tobasco T21 is the first son of Promise to be offered in this year's sale. There is a full brother at lot 16 and three full sisters to be offered later in the catalogue. On the maternal side of the pedigree we have the well-known Canadian donor dam, Codiak Acres Niome GNK 5X. Milk and outstanding udders are a huge feature of this maternal pedigree.

Check out the carcass in this bull! Talbragar T97 - named after the Talbragar River at Coolah, NSW, where Justin grew up - is in the top 10% of the breed for both terminal indexes.

Talbragar T97 is out of an eye-catching daughter of Maungahina Legacy. Daughters of this mating of Spots A Roarin R73 to Maungahina Northern Star were highly sought after at our Accelerate Female Sale last September. Talbragar T97 features in the top 5% of the breed for scrotal size, with top 20-25% growth EBVs. Talbragar T97 has full brothers at lots 2, 13 and 14.

Tazer T47 is another result of our mating of Spots A Roarin R73 with the great Maungahina Northern Star. Northern Star has done so much good for our herd, and we are grateful to the McKenzie family for allowing us to use him. We know Northern Star's sons will go out and do a great job at their new homes.

Tazer T47 has full ET-bred brothers at lots 2, 12 and 14. This bull is the lower birthweight option of the three, sitting in the top 25% of the breed for this trait. He is also in the top 5% for intramuscular fat (IMF) and top 25% for the Domestic Maternal Index.

Thor T92 is the final bull of the Spots A Roarin R73/ Northern Star mating to be offered in the catalogue. He has an ideal maturity pattern to be versatile for all production systems.

Thor T92 is a great sire prospect, featuring in the top 5% of the breed for scrotal size, while also hitting the mark with all four selection indexes. Thor T92 has full ET-bred brothers at lots 2, 12 and 13. This was a very successful flush, with three full sisters retained within our herd, and two more were standouts when offered at our Accelerate Female Sale last September.

Tobruk T16 combines the well known Codiak Unique 8R and Spots 'n Sprouts Stands Alone - a combination proven time and time again to work.

Tobruk T16 is a powerful carcass bull with an earlier maturity pattern. He is loaded with red meat! He is very, very quiet. His dam, Unique N4, has been an excellent cow for us, producing the \$40,000 top-priced heifer of our 2022 sale. Unique N4 is arguably the most sound of all of our foundation cows from the 2017 drop. We have retained an exciting full sister to this bull - she was right at the top of our T-drop heifer drop. Tobruk T16 has a full brother to be offered as lot 20.

Tic Tac T93 is a brick on legs! An incredibly easy doing bull, with an early maturity pattern and loads of muscle.

Tic Tac T93 goes back to Ultra N63 on the dam side. Last year, we were visited by a United States cattle master breeder, who was on tour to select Speckle Park genetics to ship to Dubai. Ultra N63 was one of two females selected to be flushed. This cow also bred a bull we have retained within-herd, JAD Top Gun T7, who was the highest indexing bull from our meat research with the University of Newcastle, completed last year.

Torro T38 combines the well known Codiak Unique 8R and Spots 'n Sprouts Stands Alone - a combination proven time and time again to work.

Torro T38 is a powerful carcass bull with an earlier maturity pattern. He is loaded with red meat! He is very, very quiet. His dam, Unique N4, has been an excellent cow for us, producing the \$40,000 top-priced heifer of our 2022 sale. Unique N4 is arguably the most sound of all of our foundation cows from the 2017 drop. We have retained an exciting full sister to this bull - she was right at the top of our T-drop heifer drop. Torro T38 is a very similar type to his full brother, offered as lot 15.

Like his sire, JAD Quistacat Q48, Tellstar T83 is a very fluent-moving bull who will walk all day to get the job done. He is a two-year-old heifer's first calf, and this cow has gone to do an excellent job on her 2023-drop calf too, also by Quistacat.

Tellstar T83 is a really safe bull all round, with great data where it counts. He sits in the top 20% of the breed for the Domestic Maternal Index. We'd happily recommend Tellstar T83 for use over heifers.

Trainbow T102 is a Quistacat son out of a flush sister to the \$40,000 heifer from our 2022 sale. This bull is moderate, thick, and quiet.

Trainbow T102 sits in the top 25% of the breed for 400-day weight, top 30% for scrotal and a great set of carcass EBVs. He is also in the top 25% of the breed for the new Domestic Maternal Index. If you would like to learn more about Speckle Park's four new selection indexes, see page 15. A maternal brother to Trainbow T102 will be offered next as lot 24.

Tequila T39 is a son of the \$24,000 top-priced bull from our inaugural sale in 2019, JAD Napoleon N31. This bull is a “down the middle of the graph” kinda bull, which some would say is where you want to be.

Tequila T39 is an easy keeping bull that will produce females that also carry that all-important attribute, yet also milk well for their calves. He is an early maturing type, and very docile. He is bred from a full sister to the \$40,000 top-priced heifer of our 2022 sale.

Takeoff T220 is the final son of Maungahina Northern Star to be offered in the catalogue, and he is also the final bull to be named one of Dick Whale's three "picks" of the bull offering.

Takeoff T220 is the first of nine bulls in the catalogue bred from Waratah Amy P127. These nine bulls are by three different sires and indicate just how extraordinarily well this cow breeds. Takeoff T220 is a no-fuss bull, much like his dam who is leaving a great legacy in our herd.

Toucan T106 is the first of the Nikkos out of Amy P127. He is a short gestation, low birthweight option, while maturing to have plenty of power and extra bone.

This bull has an unusual loose skin pattern, indicating that he hasn't finished growing yet! He is extremely soft, and one of the heavier bulls in his contemporary group. He is exceptionally quiet too!

Toucan T106 sits in the top 5% of the breed for scrotal size, measuring in at 39cm at 17 months old.

Twist T138 is an excellent cow bull that sits in the top 5% of the breed for all growth traits. Big scrotal, big EMA, big carcass weight, big yield.

Twist T138 is sired by our co-owned New Zealand sire, Maungahina Nikko. His dam, Maungahina J13, is the same cow that bred our other New Zealand sire, Maungahina Promise. What a cow!

When it comes to great cows there is Waratah E27 - Twist T138's maternal granddam. With 115 registered progeny, this cow has been a breed changer, for sure.

A full brother to the lot 35 bull, Test Pilot T244 is just as easy on the eye as his brother before him. He too features an excellent EBV dataset.

We purchased the dam of this bull, Ravenworth Aspen 320H, in 2020 as the "Pick of the Heifer Calves", and she has bred on exceptionally well in her pairing with our Maungahina Promise. A very similar bull to his brother in phenotype, and also very strong across most traits.

Trade Mission T211 is in the top 10% of the breed for no less than EIGHT traits. With added muscle courtesy of the myostatin gene, this bull will produce high yielding, meaty calves.

Trade Mission T211 completes a very strong run of five ET brothers from the P127/Promise mating. We cannot speak highly enough of this mating, and think the proof is really in the pudding - within the pages of this catalogue. Trade Mission T211 sits in the top 10-15% of the breed for both terminal selection indexes.

Tasman T187 is an attractive young bull with a good muscle pattern, and he is proper docile too - a typical Promise son. He is a moderate, thick, easy-fleshing bull.

Tasman T187's dam, Niome N56, was a feature lot of the mature females in our Accelerate Female Sale offering, last September. She was snapped up by leading Victorian Speckle Park stud, Te Mooi Speckle Park, who appreciated her excellent structure, udder, and overall femininity.

We started the sale with a Koda Q6 son at lot 1, and we are finishing the bull offering with another very strong son, this time by our resident sire, JAD Quistacat Q48.

Topaz T120 is a trait leader for scrotal size, EMA, and fats, and is also a breed leader for both maternal indexes. He is a moderate-framed, sound bull with excellent fertility traits and docile temperament too.

Purchaser: _____ Price: \$ _____

*“Quality is never an accident; it is always the result of intelligent effort”
- John Ruskin*

- ◆ Unique Genetics
- ◆ Breed-Leading Sires
- ◆ Unlimited Potential

When we started JAD Speckle Park, we wanted to start with the very best Speckle Park genetics we could source. For us, “the best” had nothing to do with how good a “dolled up” female looked in a photo. We wanted genetic diversity with a focus on longevity. We wanted to build a large scale base from which we could measure, refine, and identify trait leaders. We opted for what is ultimately the expensive route to achieve that goal, and have transferred nearly 3000 embryos since 2016, through extensive embryo transfer (ET) programs. The result has been the development of a quality and well-measured foundation JAD cow herd to produce top quality, commercially-focussed Speckle Park - like those in this catalogue. We present a selection of mainly ET-bred 2022-drop registered purebred heifers, from around the world and from right here at JAD.

They represent a broad selection of genetics from different matings. Some of the cow families you will find in the following pages are completely unique to JAD, and this presents as a fantastic opportunity for you to source new outcross genetics for your stud. We have visited Canada

Mitchell rarely misses tagging newborn calves. It's been great handwriting practice, and we're pleased to report that his writing has improved since our 2022 calving!

and New Zealand and have built strong relationships with highly-respected breeders with whom we share a vision for the breed's future. We are offering a top-notch selection of purebred females by sires including Maungahina Promise, Maungahina Northern Star, JSF Unmarked 2D, JAD Napoleon N31, and Southern Cross Pokerface P1.

These heifers are being offered pregnancy-tested-in-calf (PTIC). Each heifer has been complementary-mated to proven sires. Ten of the heifers are PTIC by AI, with the remaining four in calf to retained sons of Minnamurra Montezuma M25. We hope you enjoy learning about this special group of females. Please peruse our 2024 offering, and we welcome your enquiry.

It's difficult to construct a pedigree so stacked full of breed greats! What a way to kickstart our 2024 offering of purebred heifers.

Unique T198 is the result of a careful stacking of genetics that took multiple generations to construct. First, we produced Maungahina Legacy daughters, packed full of growth, EMA and yield. Then we layered Maungahina Northern Star over these females to bring in breed-leading fats. This heifer's dam, Unique Q42, is a flush sister to the \$40,000 top-priced heifer of our 2022 JAD sale.

Miss Sage T272 is the first of three full ET-bred sisters to be offered in the catalogue, all hailing from Johner Stock Farm in Canada.

Miss Sage T272 has caught the attention of many who view her. She also caught the attention of our independent structural assessor, Dick Whale, who scored her an almighty 7 out of 8 for structure/docility. She is all class, with a lovely balance of muscle and softness. She has a beautiful future matron's head and muzzle.

Niome T190 is the second female of this mating to be offered, and she has been confirmed pregnant to the trait-leading \$55,000 top-priced bull of our 2023 sale, JAD Sizzler S50.

Niome T190 features in the top 10% of the breed for birthweight, top 15% for milk, top 5% for rib and rump fats, and top 10% for intramuscular fat (IMF). Her dam, Niome R7, and granddam, Niome N56, have impeccable udders and do exceptional jobs on their calves. Niome R7 has just weaned one of the leading JAD Quistacat Q48 bull calves for the year.

Copy, paste. Here is the last of the Niome R7/Promise daughters and Niome T5 - although older - is much the same as her sisters.

Niome T5 has been confirmed pregnant by AI to the trait-leading \$55,000 top-priced bull of our 2023 sale, JAD Sizzler S50. Her granddam, Niome N56, was a feature mature female offered as part of our Accelerate Female Sale in September. She was snapped up by leading Victorian Speckle Park stud, Te Mooi Speckle Park, who appreciated the maternal characteristics of this female line.

Miss Sage T283 is the second of three full sisters of this mating to be offered in the sale. It is an all-Canadian line-up with the embryos that produced these sisters hailing from Johner Stock Farm in Canada.

Miss Sage T283 has been confirmed pregnant to one of two sons of Minnamurra Montezuma M25 that we have retained in our herd. They are both low birthweight sires, but with growth and carcass EBVs to add lift to this female through her first calf.

Miss Sage T213 is the last of this all-Canadian pairing of Miss Sage 19B and Unmarked to be offered in the sale.

Miss Sage T213 features in the top 1% of the breed for eye muscle area (EMA), top 10% for retail beef yield, top 30% for rump fat, and top 25% for the Domestic Maternal Index. Like her sister before her, she has been confirmed pregnant to one of two sons of Minnamurra Montezuma M25 that we have retained in our herd. They are both low birthweight sires, bred out of one of our favourite cows on the farm, JAD L260 Zahrah R1.

Spots A Roarin T265 is the only female in the catalogue from the Spots A Roarin cow family, which has been so successful for us.

Spots A Roarin T265 is a leptin TT heifer, who is homo polled, red gene free, and a myostatin non carrier. She is a younger heifer among the offering, featuring in the top 15% of the breed for all three fats, and top 25% for milk. She has been confirmed pregnant to one of two sons of Minnamurra Montezuma M25 that we have retained.

Midnight Lady T108 is an AI-bred heifer's first calf. She is in the top 1% of the breed for rib and rump fats, top 20% for intramuscular fat (IMF), top 30% of the breed for gestation length, and top 25% for milk.

Midnight Lady T108 is sired by the \$24,000 top-priced bull of our inaugural 2019 sale, JAD Napoleon N31. We purchased Napoleon back in May 2021. Midnight Lady T108 has been confirmed pregnant by AI to our resident sire, JAD Quistacat Q48.

Purchaser: _____ Price: \$ _____

56 Maungahina Promise

We purchased Promise in 2020 for a then New Zealand record NZ\$35,000. Promise's sire is a full brother to renowned sire, Premier 101Y Logic L11, while his dam also produced our co-owned NZ sire, Maungahina Nikko. Promise has impeccable feet, legs, temperament, and is breeding extra performance. A sire not to miss.

PREGNANT F1 COMMERCIAL HEIFERS

These top quality June 2022-drop F1 Speckle Park/Angus heifers are all AI-bred by the \$24,000 top-priced bull from our inaugural JAD sale in 2019, JAD Napoleon N31 (JAD N31). Three of the four lots are all pregnant by AI to another leading AI sire in the breed for use over heifers, Minnamurra Montezuma M25. The heifers were AI'd on November 10-11, 2023, so the AI'd lots are due on August 17-18, 2024. The heifers were backed up by two sons of Montezuma that we have retained, JAD Top Gun T7 (JAD T7) and JAD Tsunami

T207 (JAD T207). They are due to calve from September 7 to October 16, 2024. This even line of speckled heifers will average around 500kg at the time of sale. They will be re-confirmed pregnant prior to sale day. We believe these heifers exhibit all of the tremendous qualities of the Speckle Park breed.

See the sale supplementary handbook for individual lot details.

Sire of Heifers: JAD Napoleon N31.
